1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Reginald Ratliff on October 14, 2005.

The application has been amended as follows:

IN THE CLAIMS:

Claims 27 and 28 have been cancelled.

In claim 31, line 1, "apparatus" has been changed to ----target device----.

In claim 32, line 1, "apparatus" has been changed to ----target device----.

2. The following is an examiner's statement of reasons for allowance: All the claims are allowable over the prior art of record because prior art fail to teach or fairly suggest a method and system for providing timing reference signal in a network including the features of receiving a timing signal at a source device; transmitting data representing the timing signal in a packet network; at a target device, receiving a packet containing the timing reference signal, and producing a synthesized timing reference signal, the synthesized timing reference signal being synchronized with the timing signal received at the source device by reference to the transmitted data at the target device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
